

Sami Amarneh

Computer Systems Engineer

Jenin, Palestine | +972 569 027 906 | samiamarneh.11@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated Computer Engineering student with a strong foundation in software and web development. Experienced in building modern, production-grade web applications and delivering real-world freelance projects for small businesses. Strong ability to work in teams, support academic environments, and develop user-focused digital solutions. Continuously expanding skills in mobile and cloud-based development.

EXPERIENCE

Freelance Web Developer — Self-employed, Palestine

- Developed and delivered responsive websites for small businesses and local clients.
- Built modern web interfaces using React and web technologies.
- Worked on real-world projects based on client requirements, focusing on user experience, performance, and responsive design.

Teaching Assistant – Web Programming Course — Arab American University (with Asal Technologies), Jenin

- Supported students in web development fundamentals, assisting with HTML, CSS, and JavaScript concepts.
- Guided student projects and assignments, and collaborated with the instructor on course progress.

PROJECTS

Sara Shall – E-Commerce Platform

- Built and launched Sara Shall, a high-performance production e-commerce platform that reached 12,000+ real users within hours of launch.
- Designed a scalable distributed architecture using Next.js, TypeScript, ASP.NET Core, PostgreSQL, and Redis/Valkey, optimized for high concurrency, fast response times, and reliable performance under heavy traffic.
- Live: <https://sara-shall.com/>

Full-Stack Web System – Eva Dar Fashion (Jenin)

- Developed a complete web-based system for a fashion store specializing in dress sales and rentals (team project).
- Built a fully functional business system for managing products and rentals, with features designed around real business requirements.
- Delivered a production-ready web solution, working collaboratively within a development team.

AAUP Bus Tracking & Reservation System — Graduation Project, Arab American University

- Developed a smart bus tracking and seat reservation system combining a Flutter mobile application with IoT hardware.
- Implemented real-time GPS tracking, passenger counting, trip management, and seat reservations.
- Integrated ESP32, 4G/GNSS, ToF sensors, and OBD2 to collect and transmit real-time bus data.
- Built with Flutter, Firebase/Firestore, Google Maps API, and real-time data services, supporting bus companies, drivers, routes, trips, and student transportation management.
- Live: <https://aaup-bus.netlify.app/>

SKILLS

Technical Skills: C++, C#, Java, JavaScript, TypeScript, React, Next.js, HTML, CSS, ASP.NET Core, MVC, RESTful APIs, Flutter, Firebase, PostgreSQL, Redis/Valkey, Git, GitHub.

Soft Skills: Teamwork & Communication, Time Management, Fast Learning & Adaptability, Attention to Detail, Leadership & Mentoring.

EDUCATION

Arab American University, Jenin BSc in Computer Engineering	<i>Expected 2026</i>
Izz Al-Din Al-Qassam Secondary School, Ya'bad Tawjihi – Scientific Stream	2022

CERTIFICATES

- Front-End Web Development – Al-Maarefa Academy
- JavaScript Development Certificate – Al-Maarefa Academy
